

Cheshire Police Headquarters building is a 20,000 square foot facility and is equipped with a state of the equipment. Within Cheshire Police Head Quarters grounds there were areas of wooden decking which were causing slip hazards to pedestrians particularly when the surface was wet.

We were advised that Cheshire Police required an anti-slip system installed onto the wooden decking areas which would not affect the overall appearance of the original wooden decking. The area of wooden decking which required attention measured 265 square metres.

Richco recommended our Wood-Deck system which was applied onto the fully prepared wooden decking areas to provide a decorative anti-slip finish.

The finished wooden decking area met with the client's requirements by providing a decorative anti-slip finish which did not affect the overall appearance of the wooden decking system.
